

## Back to school (A text by the class 6b)

---

This school year was for us very different.

A severe disease stopped the world.

On the 17<sup>th</sup> of March schools closed in Berlin.

Since then students worked from home.

The diseases name is Covid-19.

Sick people get a cough, fever and feel tired.

Some people can even die.

Scientist all over the world are working on it.

In Berlin the situation is getting better so on the 4<sup>th</sup> of May we came back to school.

But our school looks different!

New rules are in place for example:

- *Our class is divided in two groups.*
- *German, Maths and English are taught at school.*
- *We have to learn the other subjects at home.*
- *We must arrive separately.*
- *We keep 1.5 m distance from each other.*
- *We must wash our hands regularly.*
- *We have to sneeze into our elbow.*
- *We are not allowed to borrow things from our friends.*

We will respect this new school rules because we want to keep coming school.

Staying at home is boring!!!

**Going to school is better than staying at home**
